

Integrated EDI Managed Services

Connect to everyone through OpenEDI™®

With Transalis Integrated OpenEDI™ there is no software or EDI knowledge required for seamless EDI Integration. OpenEDI™ is used by organisations such as **Argos, PLAY.com, Microsoft & Tetley**. OpenEDI™ removes outdated & costly EDI software & integrates any EDI standard Tradacoms, Eancom, Edifact, X12 & bespoke xml, csv etc seamlessly with any back-office, ERP, EPOS, Retail, Manufacturing, Automotive & Accounts systems like Sage, SAP, Syspro, Navision, Syteline, Proteus, Pegasus, Oracle, Odette etc.

Seamless EDI Integration

Integrated EDI the way you want it!

Low cost, high productivity, optimized processes with Managed Services for Web, Integrated & Supply Chain EDI.

OpenEDI™ removes outdated EDI software allowing you to integrate flexibly multiple EDI documents & standards between multiple networks, systems & trading partners.

OpenEDI™ is about connectivity between organisations, people, processes & technology. Existing systems rely on communicating parties having previously agreed standards, message formats & processes. It is exactly this restriction, complexity, the 'integration nightmare' & associated costs when establishing EDI between partners that OpenEDI™ removes.

By default, proprietary systems from different vendors fail to integrate efficiently. OpenEDI™ provides the 'glue', enabling organisations of all sizes to communicate electronically with each other seamlessly, regardless of IT & systems deployed.

Integrated Trading Partner Solutions

- **Jane Norman**
- **MST Toiletries**
- **Microsoft**
- **PLAY.com**
- **Raleigh**
- **Vivid Imaginations**

What Users Say!

Amazon.com., EDI Team

"We'd like to comment on the Transalis OpenEDI™ integration process with Amazon. It was a pleasure to work with them. Quick responses to emails & turnaround of documents was greatly appreciated. Amazon expects vendors to integrate within 4 weeks. Some take much longer.

Transalis took just two weeks from start to finish & included AS2 testing which tends to take other vendors much longer. Even having 2-3 test files per transaction before passing the Amazon validations, the speed at which requested changes were made, was very commendable. Thank you".
