

PEPPOL Compliance for NHS Suppliers

Join Transalis, the UK's fastest growing NHS e-Procurement network

Transalis are fully PEPPOL certified.

Seamlessly (and without any additional hardware or software) transfer or receive your business documents, such as orders and invoices, over the PEPPOL Transport Infrastructure, in compliance with NHS business processes.

**PEPPOL and GS1 compliance via an
easy to use cloud based platform**

Registration within minutes

**Nothing to pay until the first
message is sent or received**

Choose Transalis as your PEPPOL Access Point for a fully managed solution which eliminates the complex processes associated with NHS procurement.

Why Transalis

Transalis have led the retail industry, supporting GS1, in Integration Brokerage (EDI) for the past decade. Even if your own systems won't yet support the new messaging standards in full, our solution will take any data formats and convert these 'on the fly' to PEPPOL standards. Our PEPPOL enabled portal and paper-to-digital solutions will allow web-based document processing to the required standard.

NHS e-Procurement via PEPPOL

In the UK, the eProcurement Strategy published by the Department of Health in May 2014, requires the use of PEPPOL (Pan-European Public Procurement Online) and GS1 standards across the NHS for all e-procurement with its suppliers.

**PEPPOL for Purchase orders, invoices
and despatch advice**

GS1 standards for product coding, location and data

All NHS providers under the NHS Standard Contract (non-payroll spend) and all NHS suppliers within category of Spend Processing must use a certified PEPPOL Access Point to send and receive documents.

Transalis ensure PEPPOL compliance at any stage during the implementation of the NHS eProcurement strategy, regardless of capability, current systems or size of your organisation.

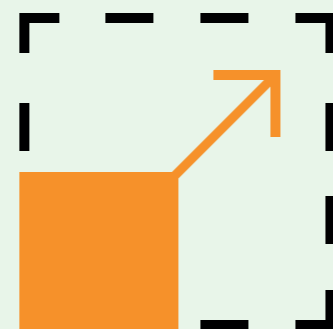

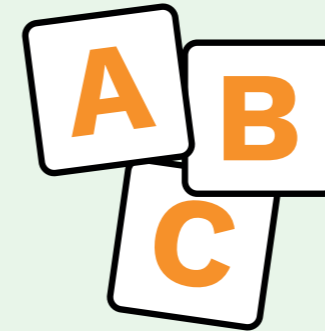

Speed

**Gain PEPPOL
compliance within
hours of registering
with Transalis**

Ease of Use

**Single view of all orders
and invoices via web
portal/mobile access**

Scalability

**Solution can scale
easily as suppliers are
added to supply chain**
